

**Overview of Early Intervention Services for Schizophrenia**

**Introduction to Early Intervention for Schizophrenia in CT**

**Vinod Srihari, MD**  
**Laura Yoviene Sykes, PhD**

## **Overview of Early Intervention Services for Schizophrenia**

### **Thursdays 2-3pm EST**

Session 1: Introduction (April 27<sup>th</sup>)

Session 2: Module A - Early Detection (May 4<sup>th</sup>)

Session 3: Module B: Case Formulation (May 11<sup>th</sup>)

Session 4 and 5: Module C: Coordinated Specialty Care (CSC) (May 18<sup>th</sup> & May 25<sup>th</sup>)

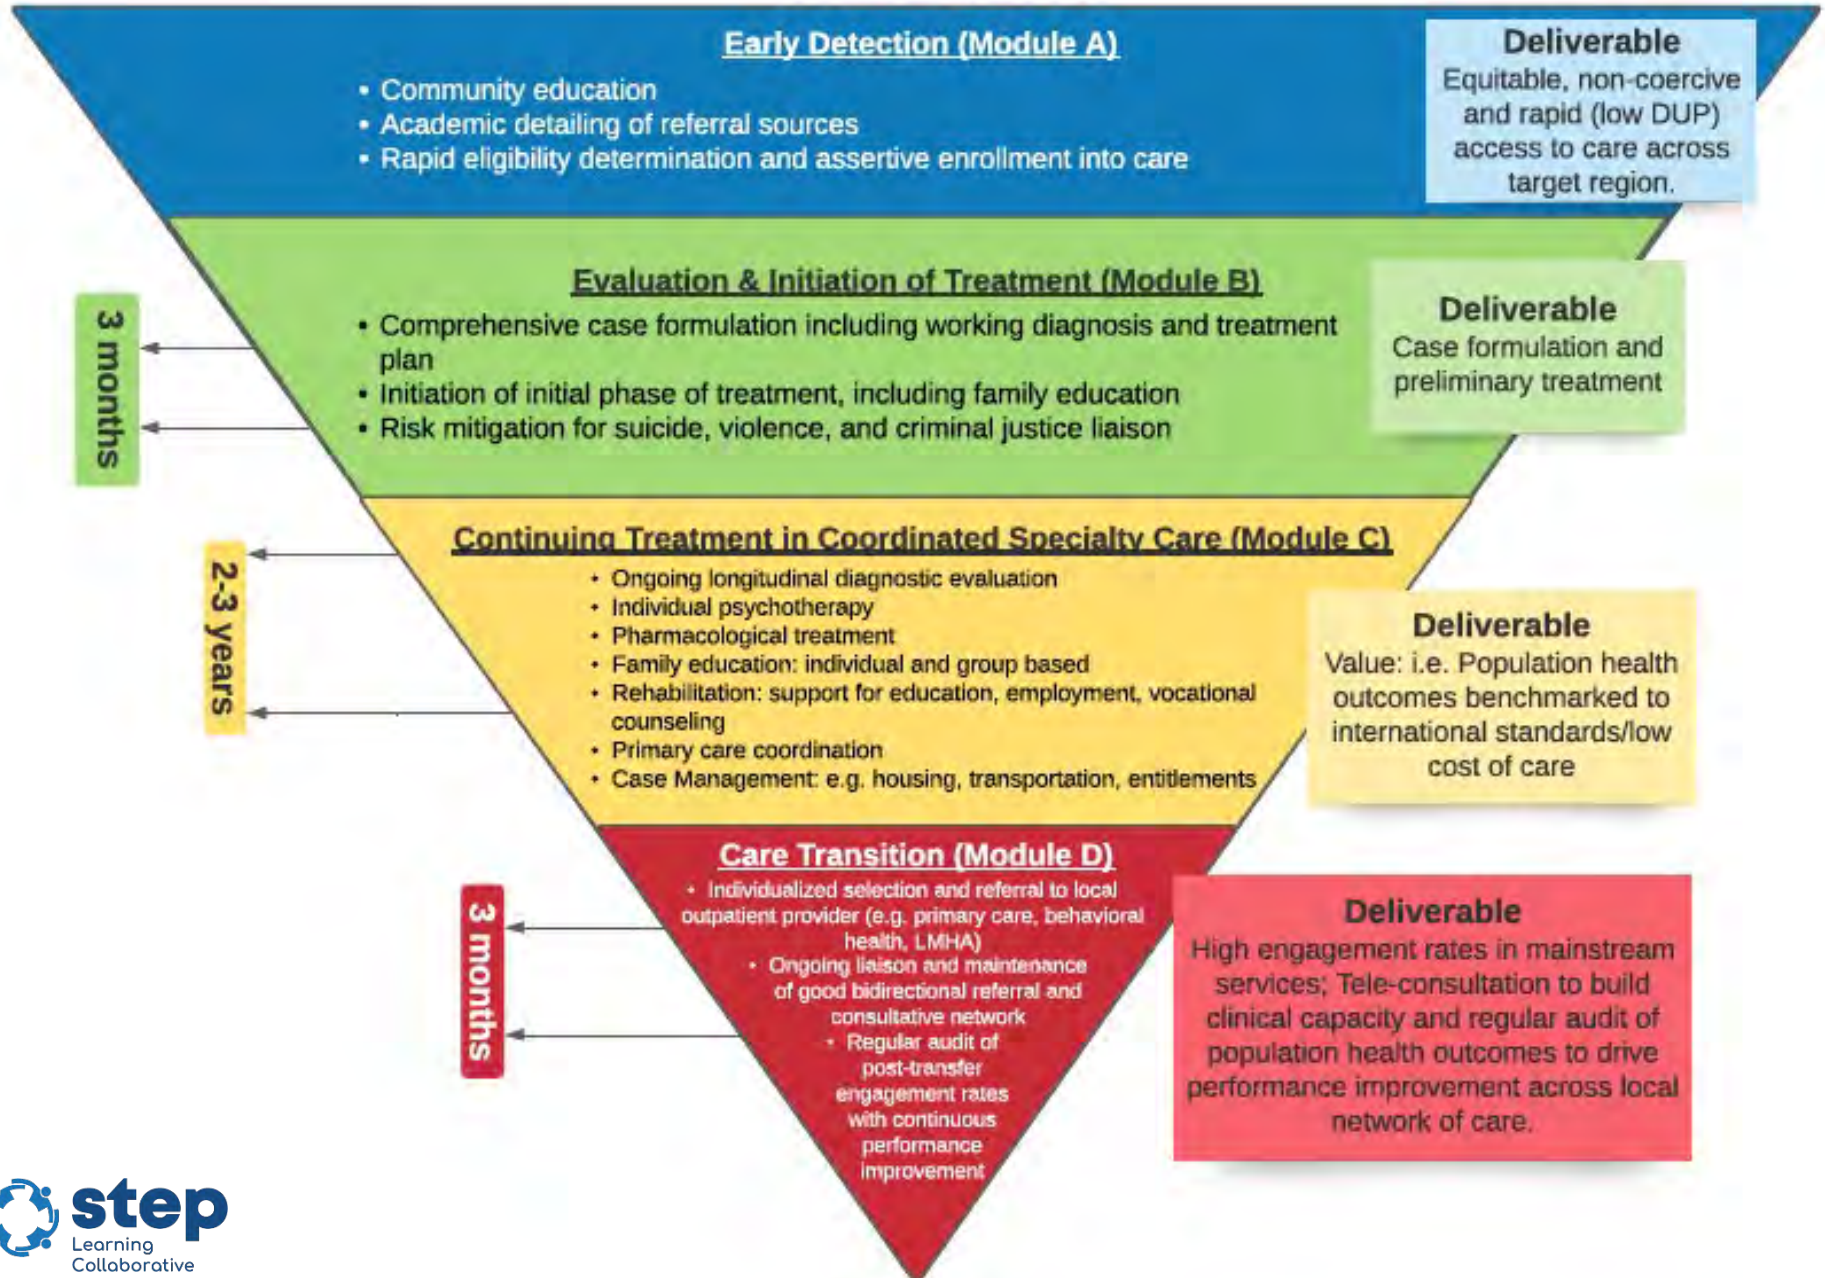

Session 6: Module D: Transitions of Care and Review of Population Health based EIS (June 1<sup>st</sup>)

- [STEP Learning Collaborative](#) – workforce development and community education initiative to bolster provider capacity to serve folks experiencing recent onset schizophrenia spectrum disorders across Connecticut
- **for Behavioral Health Providers:**
  - “Overview of EIS for Schizophrenia” Course
  - [Early Psychosis ECHO](#) - Case Discussions and brief didactics
  - [Webinars:](#) e.g.) Early Psychosis Basics, Early Psychosis Treatment Approaches
- **for Community Education:**
  - Family and community workshops
  - Virtual resources– <http://www.ctearlypsychosisnetwork.org>

# Early Intervention Service Care Pathway

www.step.yale.edu

## Key concepts:

1. Introduction to STEP Learning Collaborative and orient to course and expectations
2. The target illnesses: Schizophrenia or *primary non-affective psychotic disorders*
3. The Critical period hypothesis and Early Intervention Services
4. Evidence for Early Intervention Services, STEP's comprehensive care pathway
5. Addressing unmet need in Connecticut: a statewide Learning Health System

# The Schizophrenia(s)

El Loco, Picasso 1909

Syndromes that can (but do not always) include symptoms/signs in 5 clusters:

1. 'Positive' symptoms: 'Psychosis'
  - Reality distortion (delusions, hallucinations)
  - Disorganization (thought, behavior, expression of feeling)

# The Schizophrenia(s)

## 2. 'Negative' symptoms

- lack of motivation (*avolition*)
- reduction in spontaneous speech (*alogia*)
- social withdrawal (*apathy*)

Loss of anticipatory but  
not consummatory  
pleasure

(Felix Garcia, d. 1941)

## 3. Cognitive deficits

- Memory (working and long term)
- Attention, processing speed
- Executive functioning
- Social cognition

## 4 & 5. Affective dysregulation

- Depressive symptoms
- Manic symptoms

# Primary Psychotic Disorders

The current *Field-Guide*\* approach to classification (DSM 5)

## Non-affective psychotic disorders

- Schizophrenia
- Schizoaffective disorder
- Schizophreniform disorder
- Delusional disorder
- Brief psychotic disorder/  
Schizophreniform disorder
- ~~Psychotic disorder not otherwise specified~~
- Unspecified Schizophrenia Spectrum and Other Psychotic Disorder
- Other specified Schizophrenia Spectrum and Other Psychotic Disorder

## The Schizophrenia(s)

## Affective psychoses

- Bipolar disorder with psychotic features
- Major depressive disorder with psychotic features

\*Paul McHugh, NEJM 2012

# Age at onset of schizophrenia(s)

(Hafner, Maurer, Loffler & Reicher-Rossler, 1993)

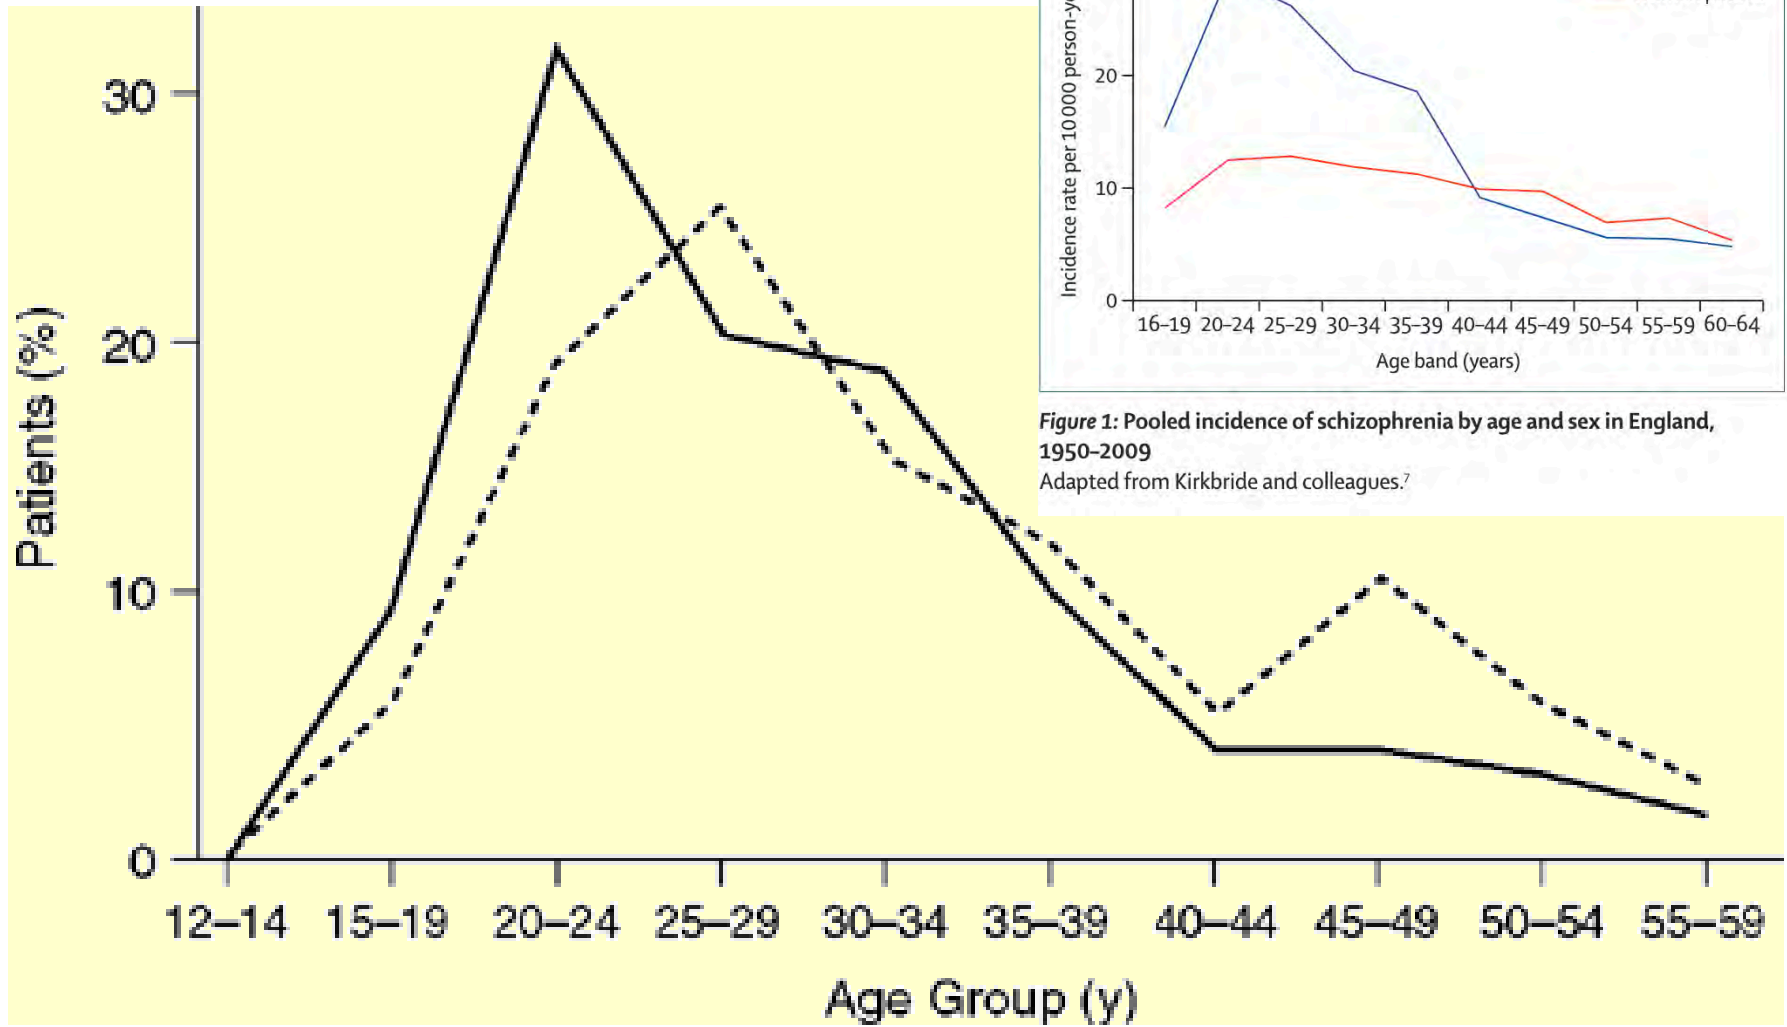

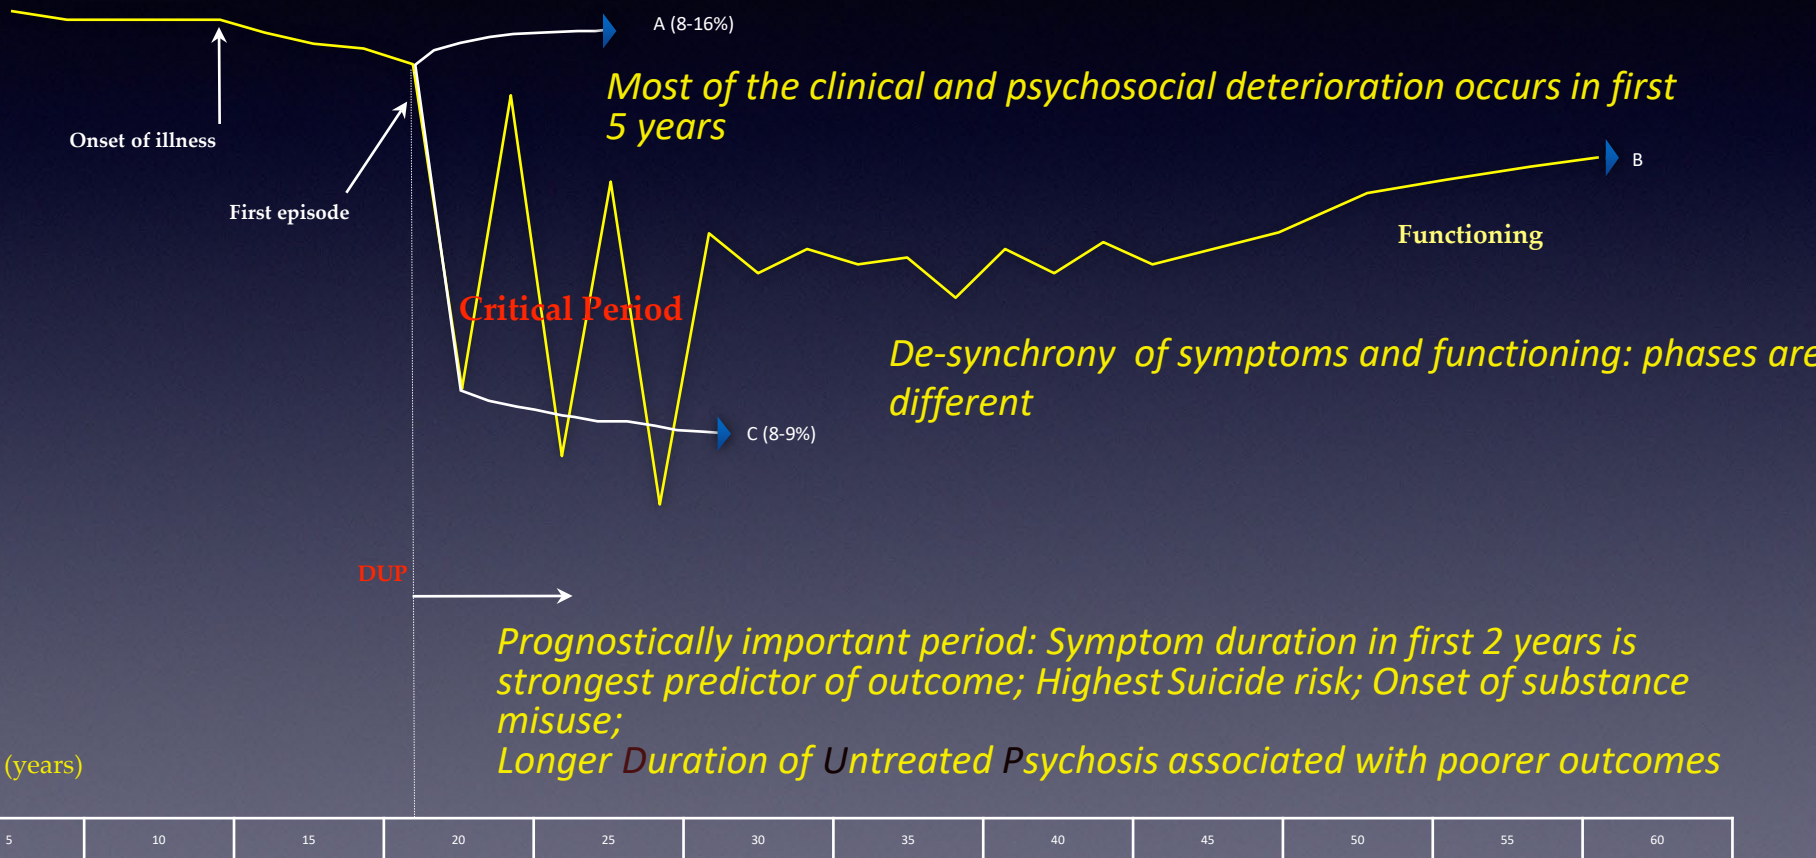

Figure 1: Pooled incidence of schizophrenia by age and sex in England, 1950-2009  
Adapted from Kirkbride and colleagues.<sup>7</sup>

# Schizophrenia(s): The Critical Period & Opportunities for Early Intervention

## Phase of illness

Premorbid Prodrome Acute Plateau / Chronic

# The Schizophrenia(s) Prognostic Heterogeneity

John Nash, 'A Beautiful Mind'

Elyn Saks, 'The Centre Cannot Hold'

Cecilia McGough  
CEO & Founder,  
**Students With  
Schizophrenia**

Felix Garcia

- Less than 1/3 'recover' over 5 years in usual care systems (Menezes, Psychol Medicine '06)
- Costs: ~\$156 billion. Direct\* (24%); indirect (76%) \*\* (Cloutier, J Clin Psychiatry '16)

\*mostly (re)hospitalizations; \*\*mostly unemployment, caregiving

(Affective d/o: \$210.5 billion)

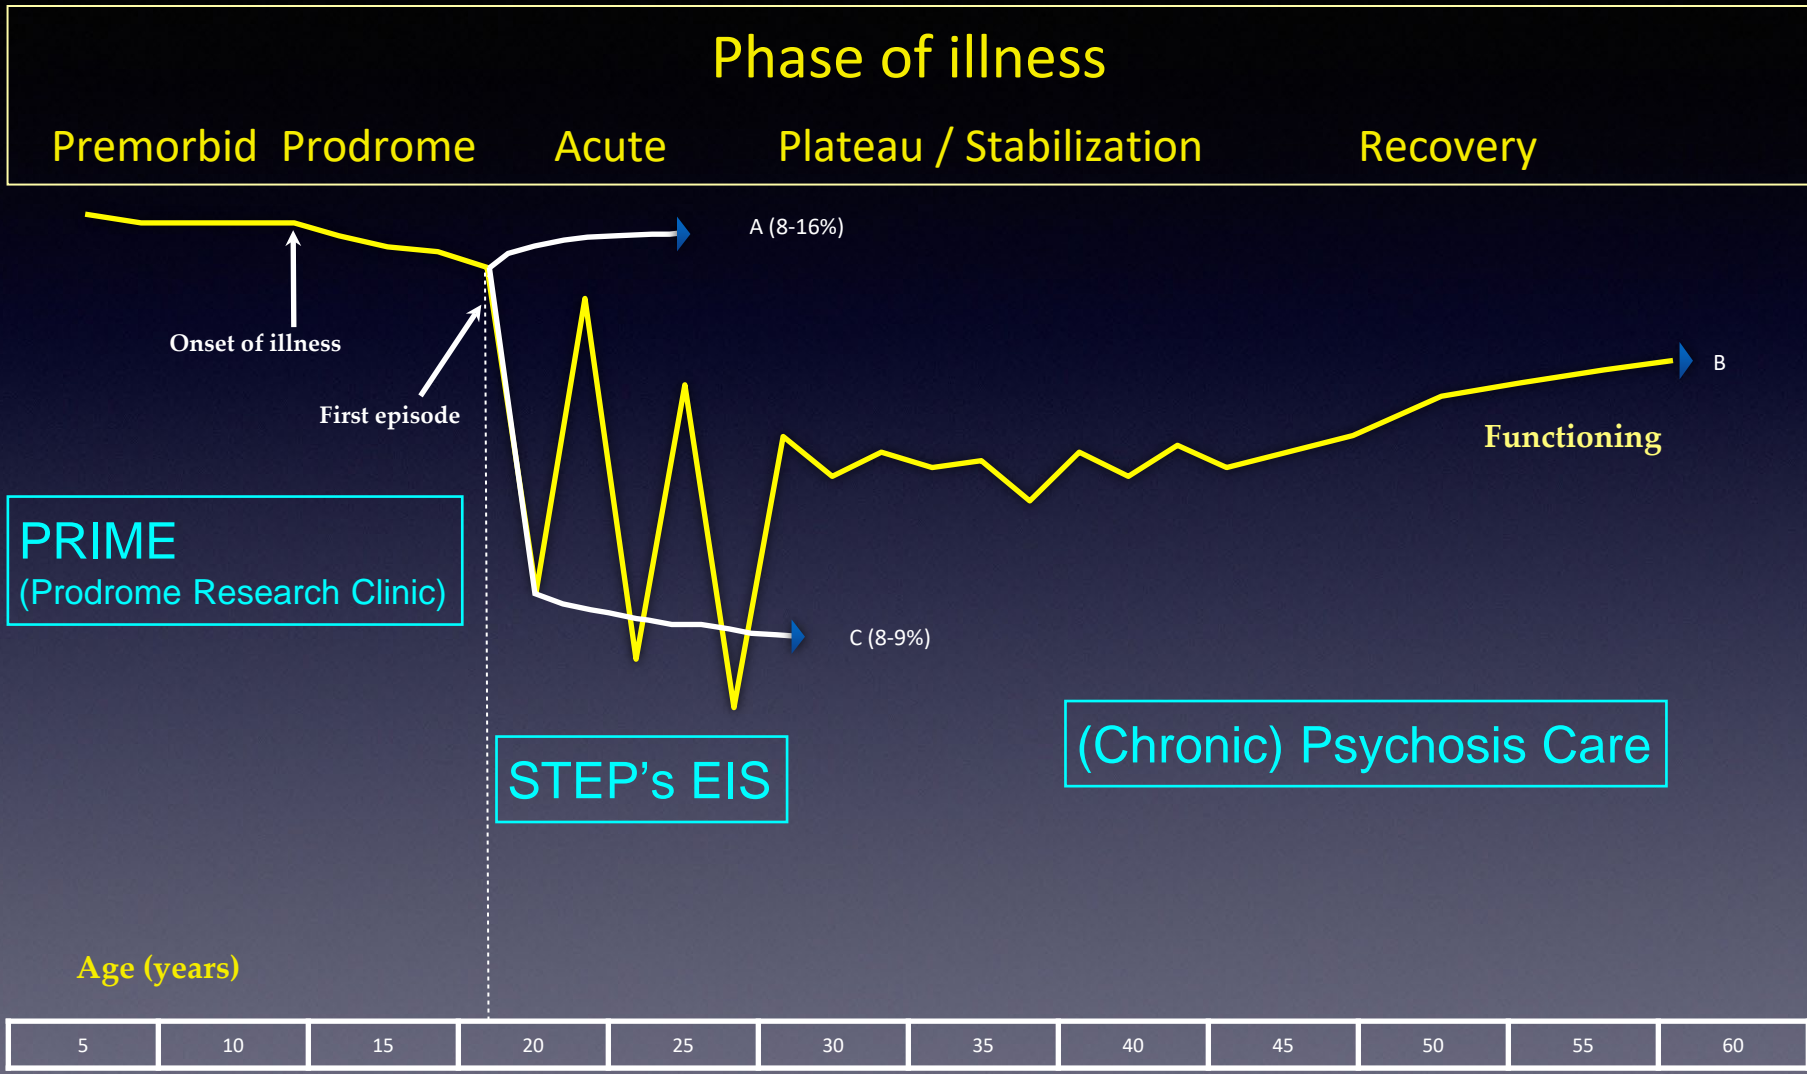

- Schizophrenia spectrum disorders are distressing, disabling and costly *under usual care*
- These are *chronic illnesses of the young*
- The early illness course reveals many opportunities for early intervention

# Early Intervention Services

---

## *Rationale and Evidence*

# Early Intervention (EI): current best practices in CT

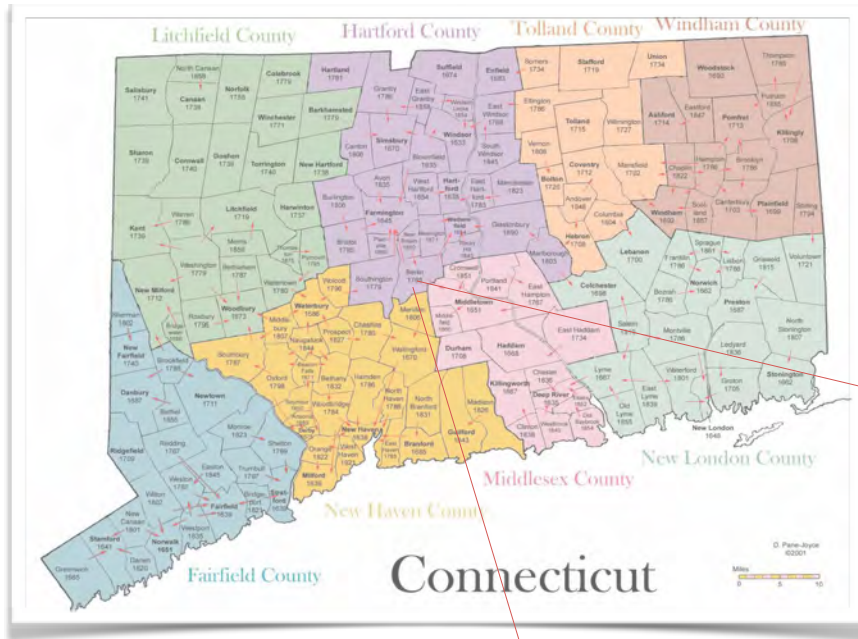

from Srihari et al. Psych Clin of N America, 2012

- 
- A. ED:** Intervening earlier (even without enriching care) appears to have durable effects on outcome (Hegelstad et al, 2012)
- B. FES:** Intervening intensively after the onset of psychosis improves outcomes over usual care (OPUS, Lambeth, STEP and RAISE studies) at 2+ years (Correll et al., 2018)

# The Clinic for Specialized Treatment Early in Psychosis (STEP) est. 2006

- **Pragmatic RCT (2007-'13)**
  - Broad recruitment
  - Feasible interventions
  - Relevant outcomes

- **Based in public sector**  
CMHC: *DMHAS-Yale partnership*

- **Addressed barriers to access**
  - Insurance status
  - Catchment of residence
  - Adolescent-Adult agencies

# The STEP Trial

2007-'13

[ClinicalTrials.gov](http://ClinicalTrials.gov) NCT00309452  
NIH MH088971-01

Age: 16-45 yo

Duration of illness:  $\leq 12$ wks lifetime  
antipsychotic Rx AND  $< 5$ yrs illness

Exclusion: sub-induced psychotic d/o

Exclusion: DDS (DMR) eligibility

REFERENCE POPULATION  
Individuals in early stages of psychotic  
illnesses in CT  $\sim 400-500$ /yr

SOURCE POPULATION

STUDY POPULATION

Referrals from ~  
-CMHC triage  
-Private Hospitals/ERs  
-Area Clinics/PRIME  
-Colleges

TAU

Referral to private or  
public-sector care

STEP Care

Based within CMHC  
ambulatory services

FIGURE 1. One-year hospitalization and vocational engagement outcomes among STEP participants and those in usual treatment<sup>a</sup>

1. NNT of 5 for Hospitalization over first year
2. Fewer in STEP had 'dropped' out of labor force 8% (vs. 33% in Usual Treatment)

STEP progressively reduced frequency, duration of acute hospitalizations

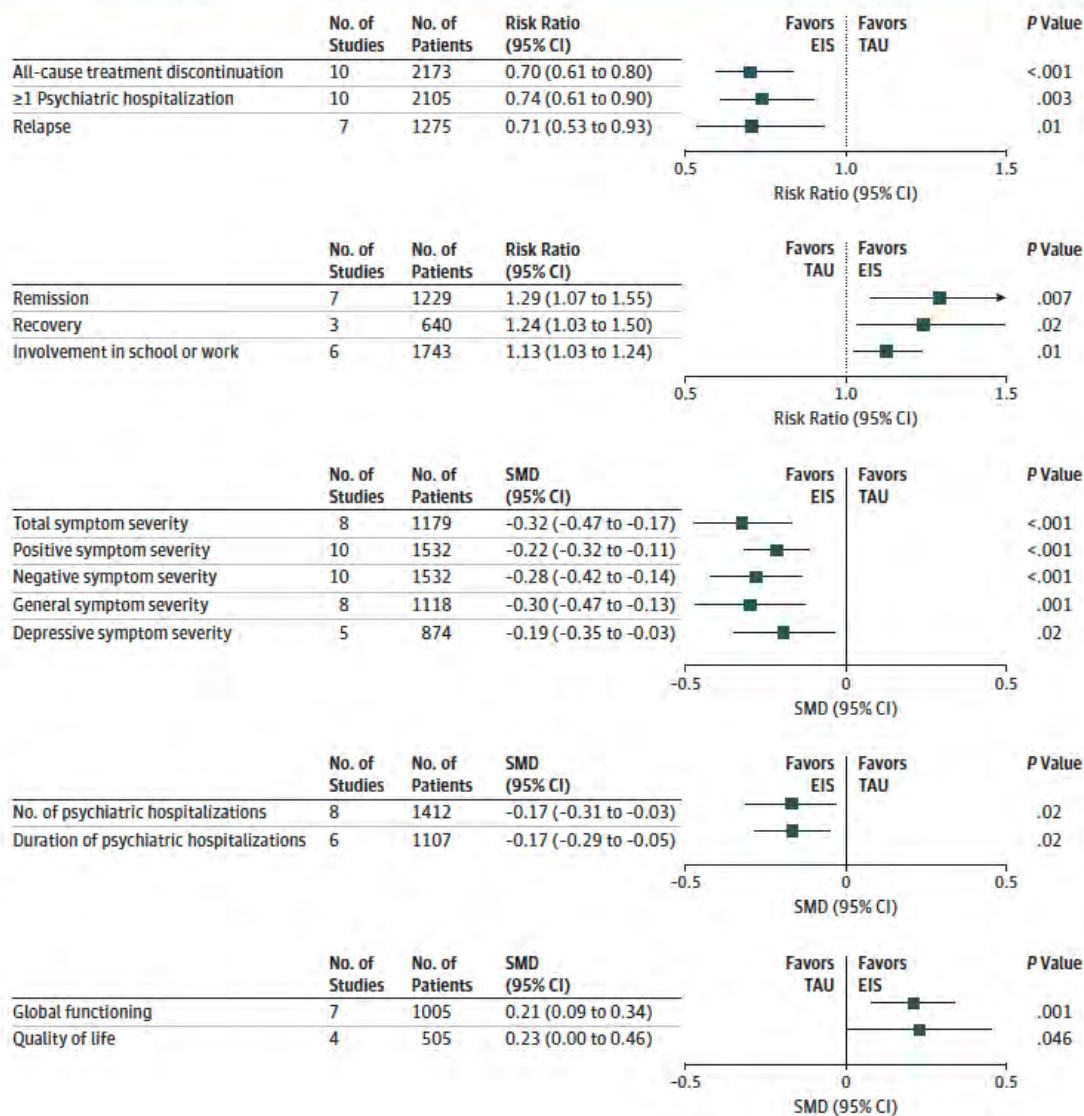

Figure 2. Summary of Pooled Results

# Risk of Relapse (Re-admission) for FES vs. Usual Care (TAU): RCTs as of 2017

- Efficacy (**can it work?**) ✓ LEO (U.K.), OPUS (Denmark)  
(high intensity ACT level services) **2005**
- Effectiveness (**does it work?**) ✓ STEP, RAISE-Navigate  
(pragmatic office-based services) **2015**
- Costs (**is it worth the cost?**) ✓ STEP, RAISE-Navigate
- Dissemination (**is it scalable?**) ✓ (UK, Denmark);
  - USA: NY, MA, OR, MD, ...
  - Connecticut: The STEP Learning Collaborative

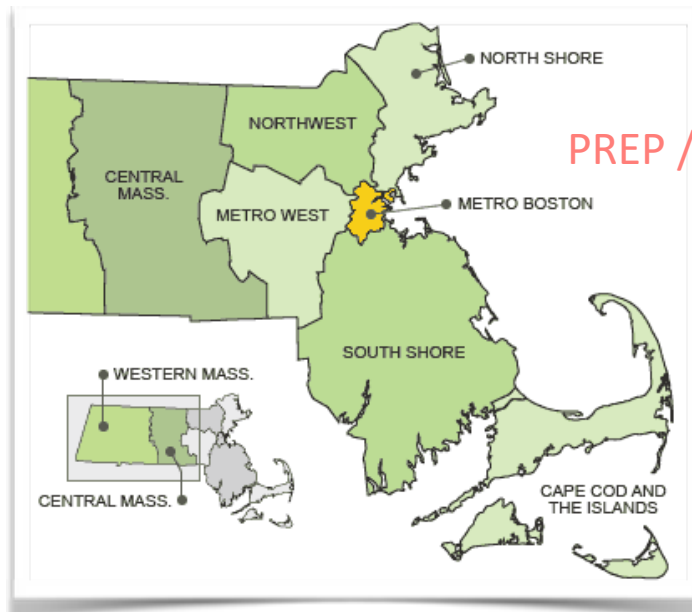

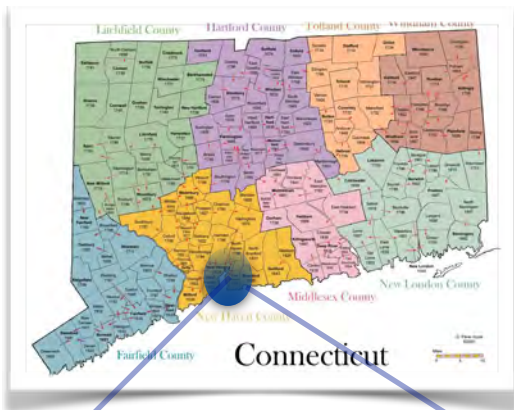

**Lt. Murgo, East Haven Police Department**

# Mindmap

Testing Early Detection  
Feb. 2015- Feb. 2019

**WHAT OUR EXPERIMENT  
ON OPTIMISM MIGHT SAY  
ABOUT YOUR FUTURE.**

**Standing on Sacred**  
chip. The 125 Street of the Harlem Renaissance has diversified, as young whites with deep pockets are pushing the prices of historic brownstones into the seven or eight figure price range. No matter the price, the places are still sacred ground, and should be recognized as such. It is important to acknowledge these places with names, markers, and monuments, but we forget. Those who don't know history are doomed to repeat it. We assure that Black Lives Matter because so many black lives were obliterated in Slavery, and because for far too long, it was convenient and comfortable to forget a heinous massacre.

**Julianne Malvanus** is an author, economist and Founder of Economic Education. Her latest book "Are We Better Off? Race, Obama and Public Policy" is available for pre-order at [www.julianemalvanus.com](http://www.julianemalvanus.com).

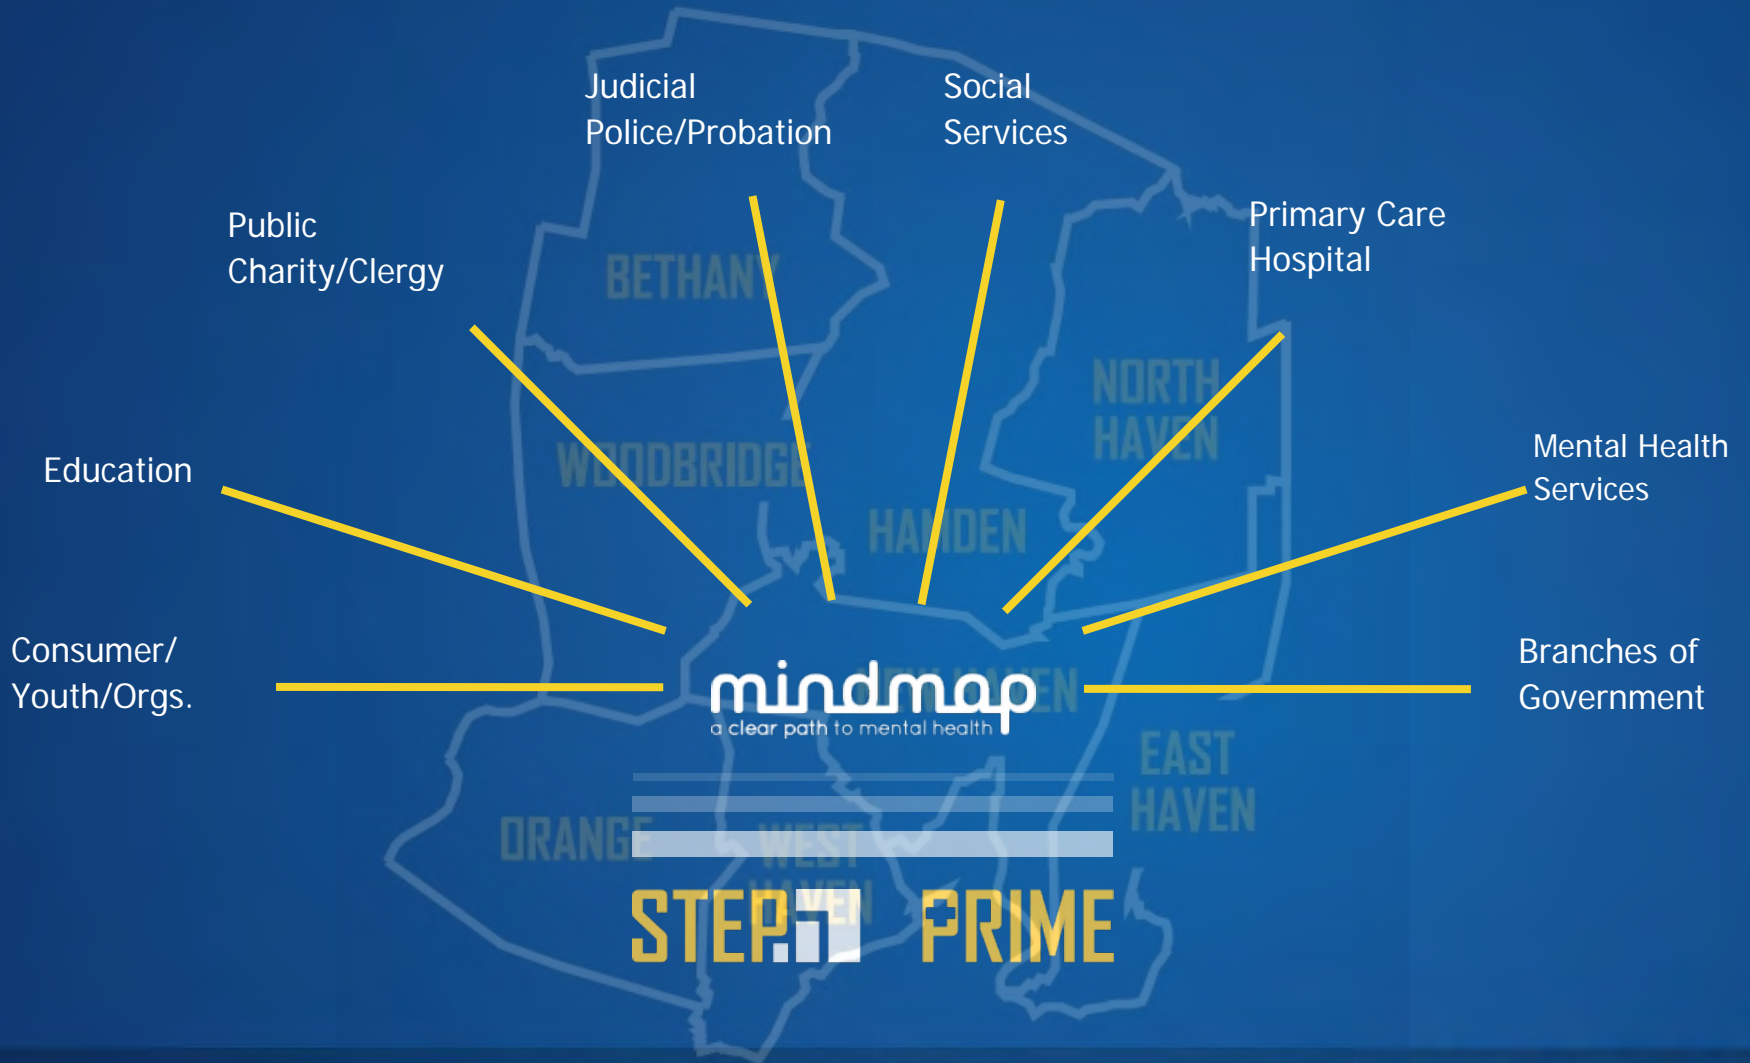

**Beyond the Rhetoric:**  
Progressive and Free Market became defining roles. Thus, America and the western world for that matter became divided into two groups of tribes. We, the NRC, found ourselves classified as Free Market and that was cool to us. The Progressives came up with this project named Barack Hussein Obama. Median name, African blood mixed with Caucasian blood and early roots in Islamic, Indonesian. It was strange to say the least.

So, when the progressive groups like Grosscup, I Prezenta, SFU and other hostile organizations launched a physical attack on the U.S. Chamber of Commerce and its members the format was set. They viewed capitalism as their enemy and a corporate ally. The Communist Party obviously as their enemy. The White House was on their side and they would not compromise in the least. The world, as we know it, was about to change. Chaos was in charge!

Mr. Allford is the President/CEO, co-founder of the National Black Chamber of Commerce. For more information about the NRC visit [www.nationalbcc.org](http://www.nationalbcc.org) or email [info@nationalbcc.org](mailto:info@nationalbcc.org).

**Integrating mass & social media: multiple channels with clear call to action**

# Professional Outreach & Detailing

# Public outreach and education

# Did 'Early Detection' work?

## Median Total DUP at STEP

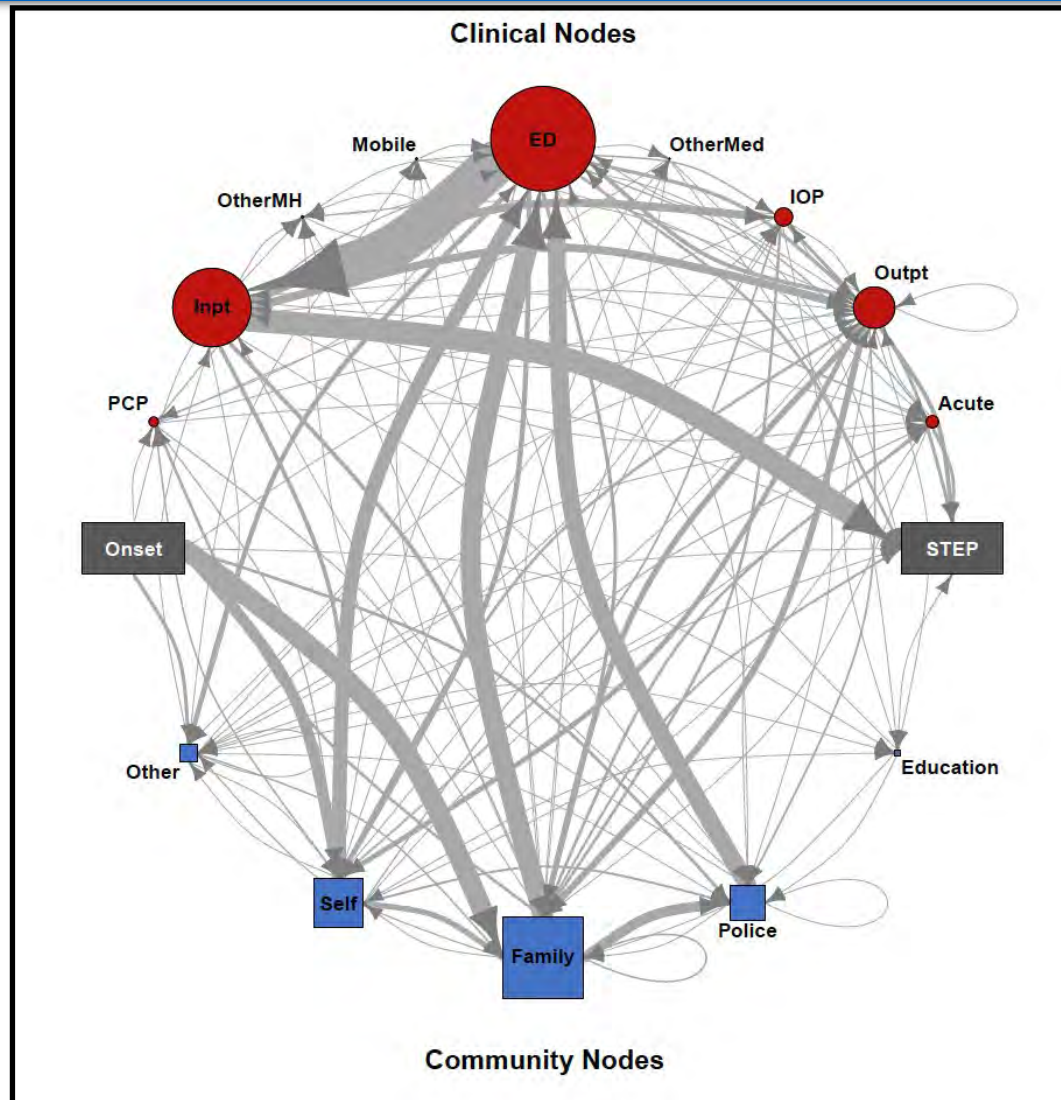

311.5	→	149 <u>Days</u>
44.5	→	21 <u>Weeks</u>
~10	→	~ 5 <u>Months</u>

Srihari et al., *Early Detection of First-Episode Psychosis in a U.S. community: A Nonrandomized Controlled Trial* (Under review)

# What happens to a person with recent onset psychosis in Greater New Haven? Pathways through the regional Network

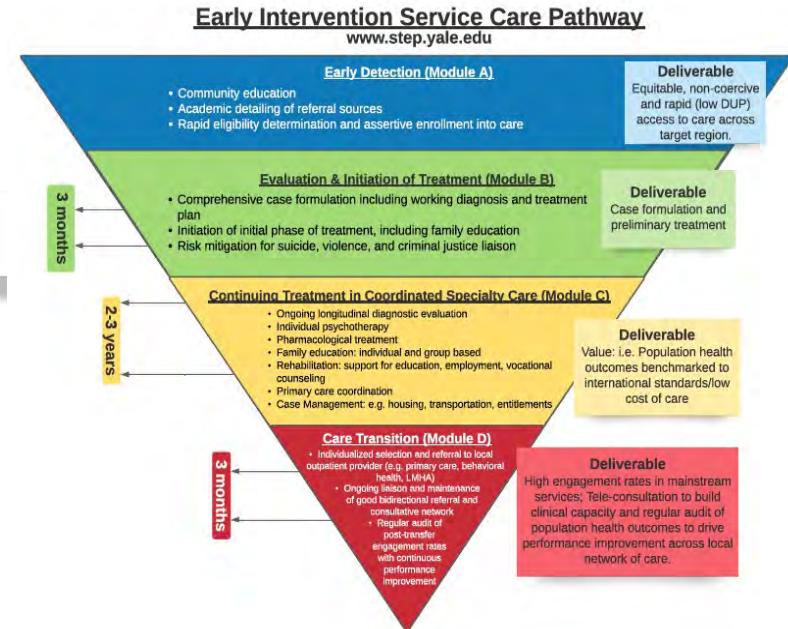

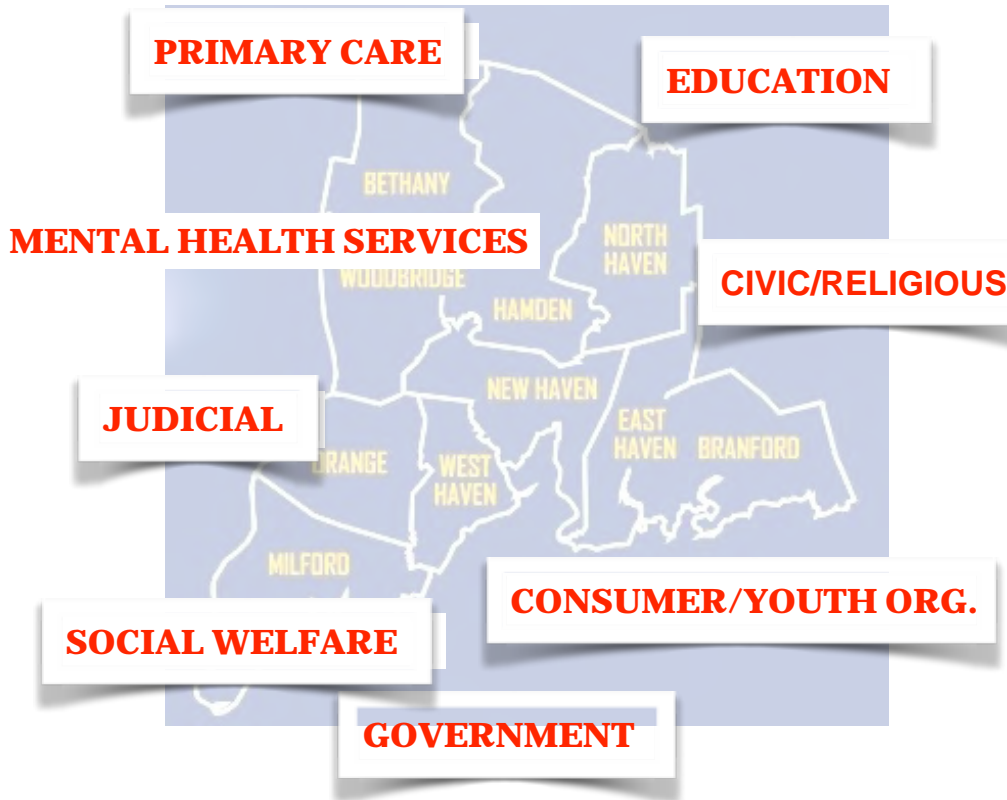

STEP has demonstrated both improved **quality** (outcomes) for those in care AND improved **access** targeting a defined catchment

This public-academic partnership has informed a comprehensive care pathway in the Greater New Haven area

Can we leverage this toward unmet need statewide?

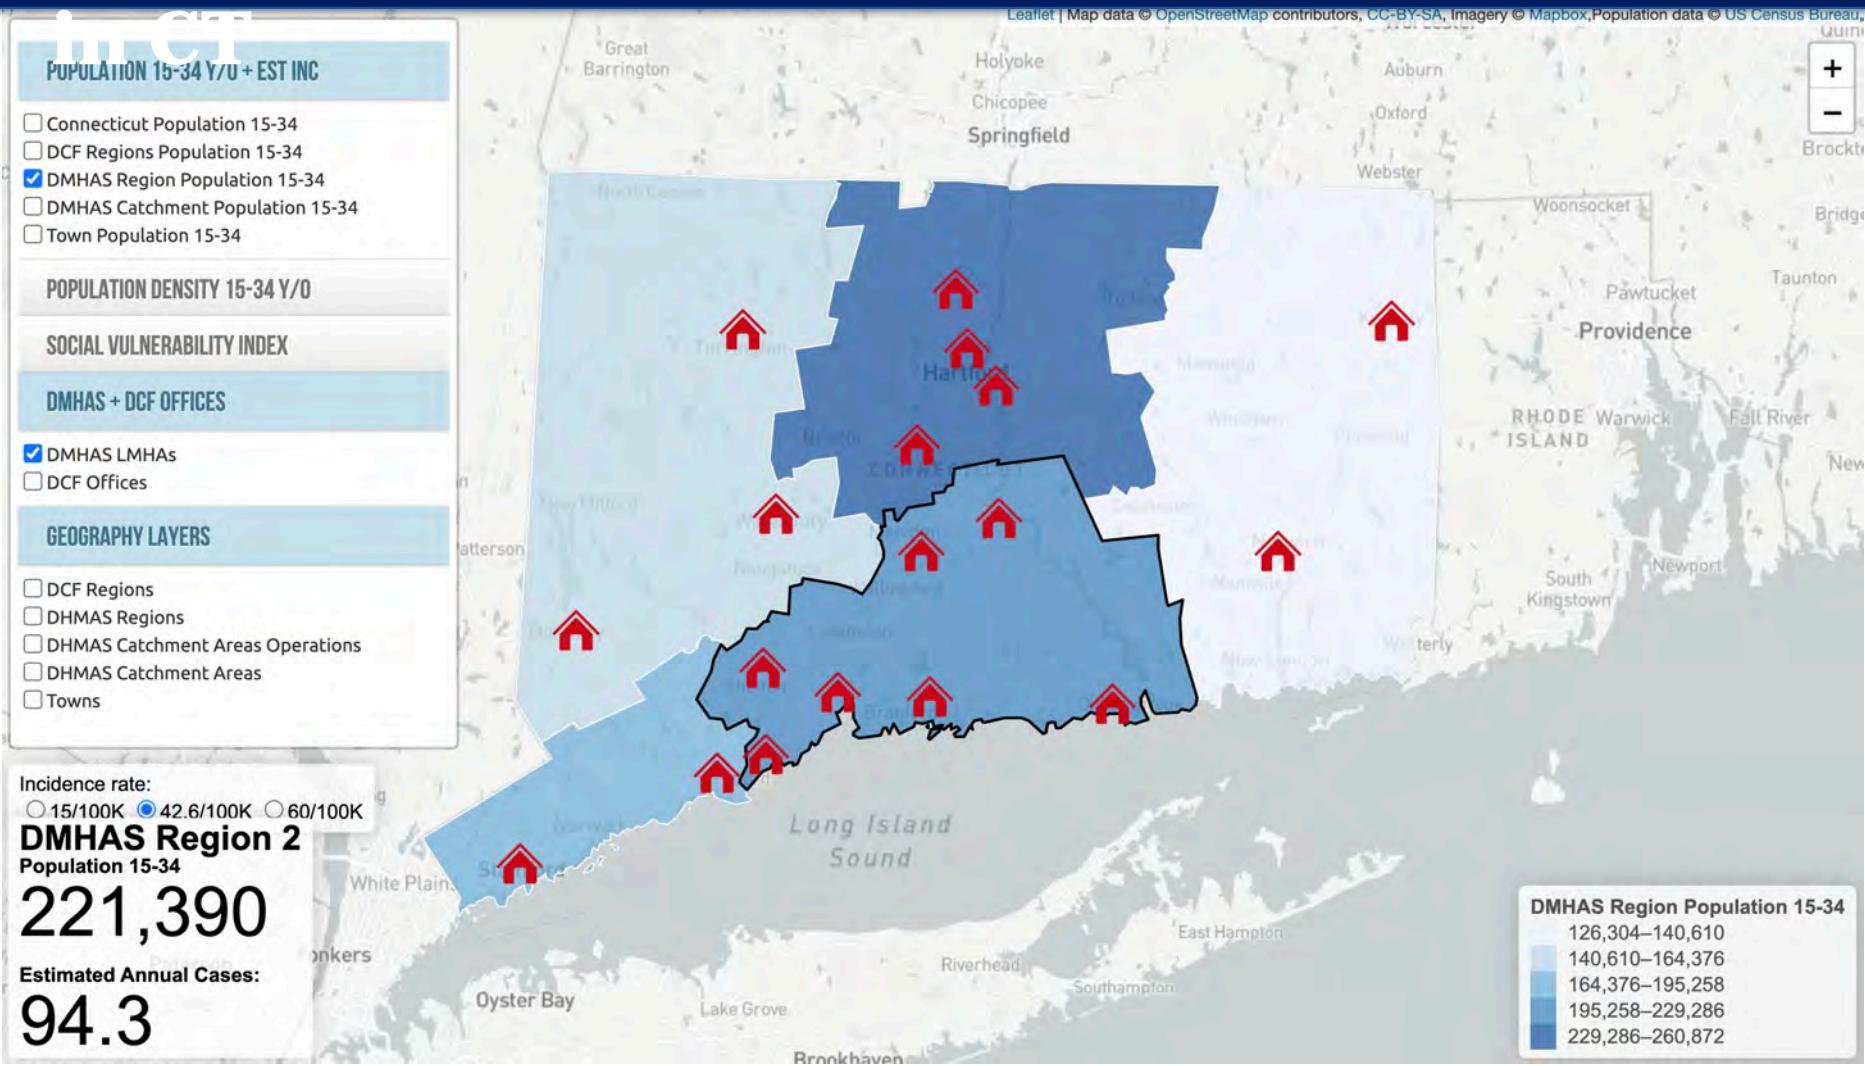

# STEP's model in Southern CT (2015- present)

This course will overview EIS as a regional integrator of care pathways

# Developing a Learning Health System across Connecticut
